Fast Track Cities Workshop Japan 2022

The **Fast-Track Cities** initiative is comprised of a global network of more than 400 cities and municipalities around the world that are committed to accelerating their urban HIV, TB, and viral hepatitis (HBV and HCV) responses to achieve SDG 3.3 of ending the HIV and TB epidemics, as well as the WHO's HBV and HCV elimination goals, by 2030. **Fast-Track Cities** is supported by four core partners – International Association of Providers of AIDS Care (IAPAC), the Joint United Nations Programme on HIV/AIDS (UNAIDS), the United Nations Human Settlements Programme (UN-Habitat), and the City of Paris. IAPAC and the Japanese Society for AIDS Research (JSAR) will co-host this workshop to introduce the Fast-Track Cities Initiative and stimulate discussion on HIV countermeasures in Japan. The conference aims to promote discussion on HIV/AIDS countermeasures in Japan and formulate policy recommendations necessary to end the HIV/AIDS epidemic in Japan. We look forward to the participation of people engaged in a wide range of HIV-related activities, including government, medical care, and prevention and awareness activities.
